

Update.....

Double R Glass & Roofing Systems Ltd is pleased to announce their intention to fabricate a second system of Conservatory Roof Kits from their production facility in Wellingborough.

After extensive discussions with Ultraframe, we made the decision that, in addition to offering Wendland Styal™ Conservatory Roof Kits, we will be offering the Ultraframe Classic range. This represents an exciting development for Double R and is further proof of our desire to offer our customers increased products and services.

In the coming months we will be making plans to stock the various components required to fabricate the Classic Conservatory Roof Kit. However, in the meantime, we will offer kits direct from Ultraframe with a comprehensive stock of materials available immediately in Wellingborough that will enable us to fully support our customers.

It has always been our intention to offer our customers a full range of products and services and we believe that, by offering a second high quality, well respected conservatory roof kit system, we are again setting new standards in customer service.
