# Double R

High quality sealed units, decorative panels  
and conservatory roof kits since 2000, with a  
reputation for excellence and customer service

Ian Sims - Double R Managing Director

# Welcome to Double R

We may not be the biggest sealed unit and roof supplier in the industry, but we're determined to be the best. Established in 2000 we treat our customers as we want to be treated, which means deliveries when they're needed and most importantly when they're expected, high quality products and long standing loyal relationships. We have one of the most friendly and knowledgeable teams in the industry.

From our purpose built 31,000 sq.ft. facility in Northamptonshire we offer a range of traditional conservatory roofs, the market leading Guardian solid roof, double and triple glazed insulated glass units, TruShield coated IGUs and both bespoke and standard decorative glass.

Double R is also a pioneering manufacturer. Here are some of our firsts:

- Installation of the quickest For.El vertical IGU line in the world
- Purchase of an automatic leading machine to apply lead strip to glass
- Fabrication of the Guardian solid warm roof system
- Supply of TruShield, an easy clean glass coating

## Automation with a personal touch

Double R is a business based around people. We genuinely care about our customers and everything we do is to make their lives easier. Where it's in the best interests of our customers, our manufacturing process is automated, often using the best machinery available for maximum quality assurance and efficiency. Don't worry

though, we only automate where it matters. When you pick up the phone to Double R, you'll be able to speak to one of our experts.

## You're in safe hands

The range of experience, expertise and skillset within the Double R team is second to none so our customers can rest assured they're getting the best. However, to back this up we also have a 20-year warranty available on every single sealed unit we sell through the free Super Spacer Dealership programme. Just to be clear, that means if any of the sealed units we supply through the Super Spacer Dealership programme fail within the next 20 years, we'll supply another one, absolutely free.

*Ian Sims*

## Our Mission

To provide the **highest quality product** possible through our state-of-the-art manufacturing process.

To deliver the **highest standards of service** available through our highly-trained production management team and customer service personnel.

Our employees are expected to serve you with the **highest level customer-centred approach in the industry.**

# Everything Glass

Double R is a specialist in everything glass. That means we can supply double or triple glazed units, a range of glass options from all the major glass suppliers, argon gas fill, as well as toughened, solar control, laminated and fire rated glass options. We can manufacture any configuration of sealed unit for standard or bespoke projects – all to our exceptionally high standards and with the EN1279 European Standard Mark. Just tell us what you need and we'll deliver.

## Introducing GINA

Our most impressive investment to date is GINA - she handles GLASS, she's INNOVATIVE, she's brand NEW and she's AUTOMATIC. She is also the fastest vertical Super Spacer Automatic Hot Melt IGU line in the world! Automating the entire manufacturing process of our sealed units, including vertical washing, Super Spacer application, tape application, automatic argon gas coupling, sealing and shape recognition means we can manufacture any specification of unit faster and better.

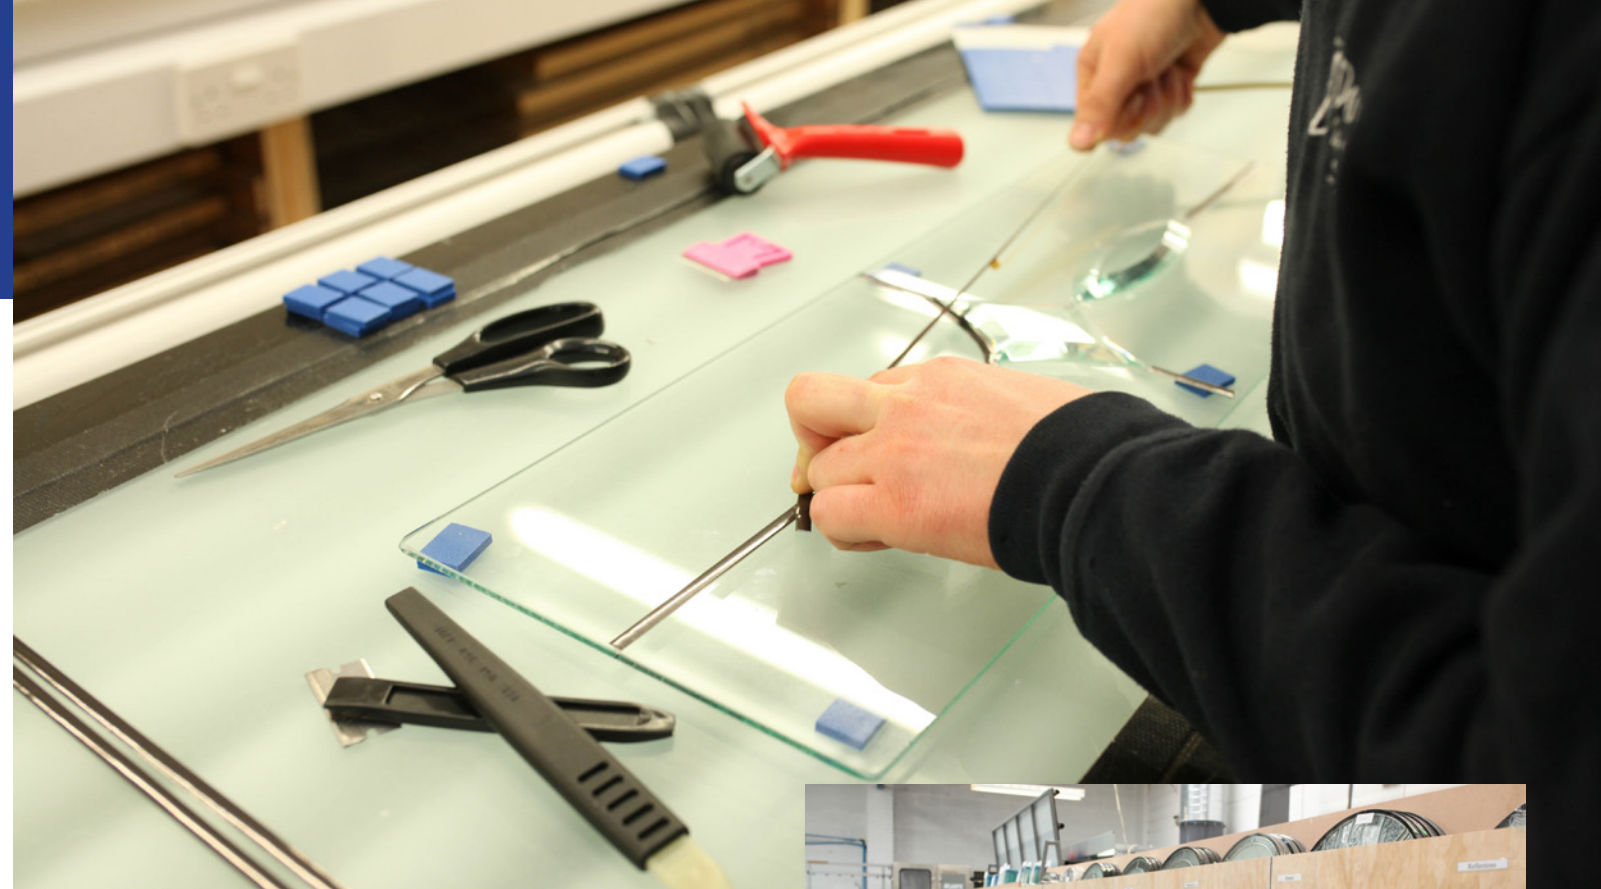

## What does this mean for you?

This in turn translates to fast scheduled turnaround times as well as quick response times for those unexpected orders. Add to this the built-in quality scanner coupled with one of our IGU experts performing

regular quality checks and our customers can be assured they will receive consistent quality time and time again.

## 20 years performance guaranteed

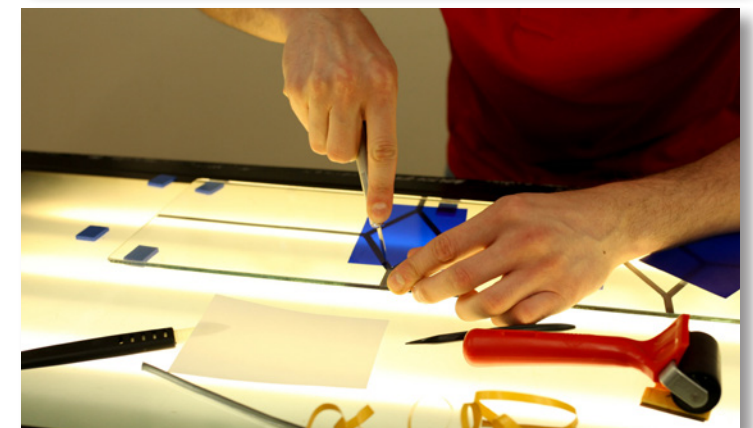

All our sealed units are available with a 20-year warranty. All our customers have to do is sign up to the FREE Super Spacer Dealership programme – available for both Fabricators and Installers – and they can enjoy this extended warranty. This means if they fail at any time in the next 20 years, we will replace them, for free. That's how confident we are in the quality of our products. The Dealership programme also comes with a whole host of marketing support if required.

Double R has a specialist Decorative Centre, to ensure we can deliver all our customers' decorative requirements, including:

- Automatic lead application for quality diamond and square leaded units.
- Fused tile panels.
- Sandblasting.
- Supply only sandblast resists.
- Lead soldering.
- Decorative bevel panels.
- Training to customers who want more support.

We also manufacture TruShield® units - a glass protection system - from our decorative centre. The TruShield coating adds a chemically bonded layer to the glass, protecting it from the elements and chemical erosion. We were the first company in the UK to offer this system and we are currently the only UK manufacturer to have invested in the full manufacturing

system, allowing us to implement our stringent quality control measures on this process, as well as enabling us to price it competitively so our customers can make savings compared with other similar coatings.

# Decorative Centre

# Conservatory Roofs

## Traditional roofs

Double R Glass & Roofing Systems offers traditional polycarbonate and glass conservatory roofs with both the Eurocell and Wendland roof kits.

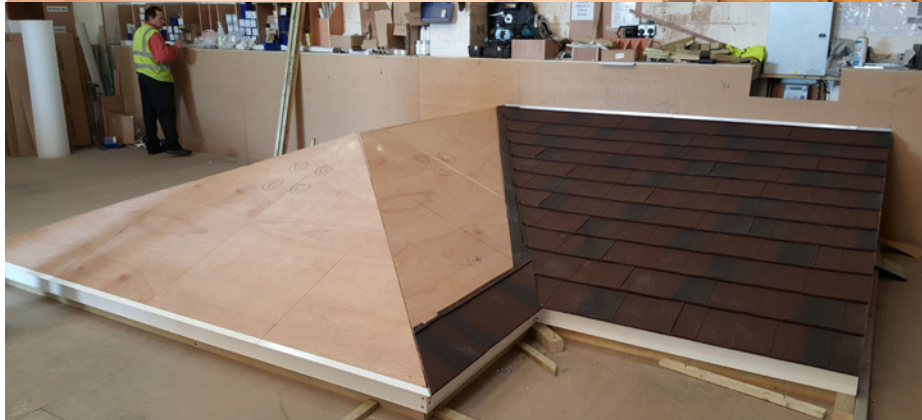

We supply our customers with brand new conservatory roofs, replacement roofs, standard styles as well as the more unusual and bespoke projects. Our experienced team have such wide ranging expertise, we can and do help with even the most challenging conservatory design requests. They can also offer as much or as little additional support as required including assisting through survey, processing, manufacture and training.

## Solid roofs

Solid roofs for conservatories are still a growth sector. Double R Glass & Roofing Systems are one of the industry's pioneers in this arena as the first fabricator in the UK to offer the Guardian solid warm roof system.

As a supply only specialist and the first UK

fabricator to offer the system, we have developed a team of experts that are on hand to answer technical queries from those more experienced in the solid roof market, or to offer more hands-on support to those new to the sector.

## The Double R difference

The experienced and friendly team at Double R are committed to delivering the following products on time, every time:

- Double glazed insulated glass units
- Triple glazed insulated glass units
- TruShield coated insulated glass units
- Decorative sealed units
- Guardian solid warm roof system
- Eurocell & Wendland conservatory roof kits
- Glass options from all major glass suppliers
- Toughened glass
- Solar control glass
- Laminated glass
- Fire rated glass

And don't forget, we also offer a 20-year warranty on all sealed units as part of the Super Spacer Dealership programme. As soon as anyone new visits Double R they can feel how we're different. The atmosphere is welcoming, the factory is clean and efficient and every member of the Double R team they encounter

will greet them with a friendly hello. We all enjoy what we do, and we do it with pride. **That's the Double R difference.**

So, if you want to work with a glass and roof system supplier who will take a genuine interest in your business, offer expertise and hands-on support where needed and deliver quality products every time, we'd love to work with you too.

If you want to find out more, or if you want to pop in to meet the team or see GINA in action, call Wayne Mills today on **01933 443658** or **07791 275552** or visit [www.glassandroofs.com](http://www.glassandroofs.com) for more information.
